College of Sciences & Mathematics Newsletter - March 2019

## Featured News

# Water Conservation Research

Dr. Jennifer Bouldin and her students discuss the research they will present at Create@State this April on the Create@State podcast.

[→ MORE DETAILS](#)

## Research Spotlight

# Rice Study

Dr. Argelia Lorence, professor of metabolic engineering, is teaming up with two other universities to build greenhouse tents in Harrisburg, Ark. Click [here](#) for the full story.

## Faculty Spotlight

# Climate Change

Dr. Virginie Rolland, associated professor of quantitative wildlife ecology, was interviewed by [The Atlantic](#) for an article about a study on climate change and city climate pairings. She referred to her own research on eastern bluebirds, whose migration patterns are already impacted by environmental changes.

## Faculty Spotlight

# Grain Storage Research

Dr. Tanja McKay, director of environmental sciences and interim director of molecular biosciences, and Dr. Virginie Rolland co-authored an article in *Journal of Stored Products Research*. First author is Rachel Hampton, who worked in McKay's lab and completed a master's degree. Click [here](#) for more.
