

Initial Programs Unit Assessment Committee
April 25, 2012
Minutes

Present: David Holman, Steve Bounds, Joanna Grymes

Bounds stated that he had requested the assessment data three times and still had not received the data for the committee to review.

Grymes stated that her report had been submitted to the committee.

Holman stated he was still working on crafting a response about how Common Core State Standards (CCSS), InTASC and our current standards are intertwined. At a primary level, it is possible that the changes would not have real effects on teacher education programs. At a philosophical level, the CCSS will require very deep changes in our programs, if these standards will truly drive education. He will continue to work on a report and send it out to the committee.
