

Initial Licensure Unit Assessment Committee
March 14, 2012
Minutes

Present:

D. Holman (chair), A. Bowser, S. Bounds, J. Grymes

InTASC has been adopted by the state and so we are working from that document.

Task 1: Create a chart to mirror the Advanced Programs Assessment Procedure Sheet. Joanna will work on this.

Task 2: Revision plan for InTASC standards.

Holman suggested that there will be a change due to Common Core because of the integration of content teams.

Spiral curriculum, knowledge of the discipline – would be major shifts

David and Audrey would look at CCSS and InTASC standards and how they need to be considered as we consider needed changes for the Conceptual Framework.

Audrey stated that CCSS has a strong field experience aspect to professional development and so that would be something to consider with our assessments.

Task 3: Steve will pull the initial licensure unit data and make a report.

Task 4: Ann and Joanna will look at current Unit Assessment System and see how that works for the initial licensure.

April 11 12:45 next meeting
